

# Store? What Store?

By Holly Lisle

Okay. In spite of my testing, ebook store software #1 was very good at taking money, and very bad at delivering the ebook. Crappy combination.

I killed the store and hand-sent ebooks to everyone who purchased. I have a second software program I'm testing now.

When I get it going, I'll monitor it closely, so that if it, too, fails, I'll be able to kill it and quickly deliver CCC to those who purchased. If this second one doesn't work, I'll quit trying to set up pre-grand-opening sales and we'll all just wait.

Beta testers are doing magnificent work on the REAL store, by the way. Thanks to all of you who are participating in that.
